

# Tippecanew<sup>s</sup>

A monthly summary of municipal affairs and activities in Tipp City, Ohio

## Guidelines for a Recreational Fire

A recreational fire may be rekindled providing the following restrictions are adhered to:

- The fire is not offensive or objectionable because of smoke or odor emissions or when atmospheric conditions or local circumstances make such fires hazardous.
- The wind velocity must be less than 10 MPH as indicated by the National Weather Service, and is in a direction to carry smoke away from neighbors. This can be monitored by TV channels 23 and 56.
- The fire must be located a minimum of 25 feet from any structure. Conditions which could cause a fire to spread within 25 feet of a structure shall be eliminated prior to ignition.
- It must be fueled with clean dry firewood, natural gas or equivalent.
- Fire extinguishing materials must be at site of burning at all times.
- The fire shall be attended by a sober, responsible adult at all times.
- The fire shall be extinguished immediately when the event is completed and/or the responsible adult is leaving the fire.
- The fire shall be limited in size not larger than 3 feet in diameter and 2 feet in height.
- A recreational fire is one that is intended for cooking or enjoyment of those present.
- Trash, yard debris, leaves or any other smoke producing materials shall not be burned. ●

**4<sup>TH</sup> of JULY Fireworks Display** The 2019 Fireworks display will be held on Thursday, July 4th at Kyle Park. Rain date is Friday, July 5th. ●

## Mosquito Fogging Dates

The City will be performing mosquito fogging applications throughout the City on **June 12th** with a rain date of **June 13th**.

### Future Fogging Dates:

- June 26th with rain date of June 27th
- July 10th with a rain date of July 11th
- July 24th with a rain date of July 25th

The mosquito fogging will begin at 9:00 pm and will conclude by 3:00 am on the dates stated. Beginning on the

western side of the City and proceeding easterly fogging the entire community.

Residents are advised to avoid direct contact with the fogging mist and to close home and automobile windows. If rain or wind conditions prevent fogging, the City will reschedule applications. Additional fogging may occur later if needed. Any questions can be directed to the City Utility/Services office at (937) 667-6305. ●

## QUIET ZONE & SAFETY SURVEY

The Quiet Zone Citizen Committee was formed to research the safety and feasibility for Tipp City quiet zones, determine if the citizens are for or against them, and then report the findings to City Council. In order to establish a Quiet Zone, cities must implement Supplemental Safety Measures (SSMs) to ensure the continued safety of the crossings. After implementation, studies have shown that crossings are just as safe and in most cases, even safer. The committee would like to know what you think. Please use the following link to take this short survey. This survey will help in their report to the City. <https://tinyurl.com/quiet45371> ●

## Miami County Recycles

The Miami County Solid Waste District will be collecting household hazardous waste every Wednesday from April – September from 9 am – 1 pm at the Transfer Station. Please note the cost for this program is \$1 per pound. They are located at 2200 N. County Rd. 25A in Troy.

Items for proper disposal include: paint cans (latex and acrylic), aerosol cans of paint, strippers, pool chemicals, gasoline/kerosene, fluorescent light bulbs, household cleaners, antifreeze, varnishes and stains, wax/adhesives/sealants, pesticides, transmission fluid, mercury, turpentine, fertilizers and unknown chemicals.

Materials that are not taken include: medical waste, commercial hazardous waste, needles/syringes and other sharps, electronics, ammunition and explosives.

For more information contact Miami County Sanitary Engineering at (937) 440-3488 or their website at [www.miamicountyrecycles.org](http://www.miamicountyrecycles.org). ●

## Tips for a Water-Wise Yard and Garden

**D**uring the rainy spring season it seems odd to “worry” about a drying garden problem, but not too long from now (two months?) it will be a typical hot, dry, Ohio summer, and we will be concerned about the lawn and garden getting too dry. Landscape watering is one of the biggest users of water, but there are a number of easy ways to save on the water bill and still maintain a beautiful yard and garden.

### 1. Install a rain barrel and catch water from the downspouts.

Not only is rainwater free, it is not chlorinated and therefore a better option for plants. Rain barrels have become more popular in recent years, come in a variety of sizes with lids to prevent mosquitoes, and are easy to use. Most home improvement places carry them.

**2. Aim your downspouts toward the lawn (or a rain barrel) not the pavement.** Many homes come with the downspouts aimed onto driveways, or straight into underground pipes and out to the street or storm drains; this shoots the water quickly away from garden or lawn and it causes “shock loading” of the storm drain system and the rivers.

**3. Add compost or similar organic matter to your soil.** Adding at least one inch per year enhances the water-holding capacity and improves soil texture and composition.

**4. Plan ahead of time.** Group your plantings into high, moderate, and low water-using zones; take advantage of your yard's characteristics.

**5. Apply mulch to the garden surface.** Mulches reduce water evaporation, erosion, and weed growth while enhancing the look of your garden.

**6. Mow up your leaves and lawn debris and leave it on the lawn.** While it may require two mowings to make the leaves and pruning debris small enough to fall in amongst the leaves of the grass, it will add “compost value” to the soil surface and thereby assist in retaining scarce rainfall during the hot summer months.

**7. Water before 10 am.** Watering in the heat of the day means more evaporation and less water for the lawn. Afternoon or evening watering may also promote lawn diseases.

**8. Minimize the addition of fertilizers and pesticides.** Extra fertilizer increases water consumption and phosphorous-containing products that run off into the storm drains where they feed the weeds in our rivers. Check how much your lawn needs;

many home improvement stores carry soil self-test kits for under \$20, less than the cost of the wasted fertilizer! When fertilizing, take care to avoid throwing any on sidewalks, curbs, or streets because all of it will go straight to the creeks and rivers with the next rainfall.

### 9. Consider the best type of grass and plants for your yard.

Some grass types need more water than others. Fescues tend to require less. Ask your grass seed supplier which choices will need less water and maintenance. There are also grass types that need less mowing while still looking good.

**10. Reduce the size of your mowed grass areas.** Consider using more low-maintenance area plantings of perennials or ground-covers. Let the hedges and border planting spaces get a little wider and reduce the area to be mowed. Choose water thrifty perennials that are native to Ohio. Use low-maintenance area plantings and groundcovers to round your corners to make for faster mowing and less trimming

### 11. Mow high.

Set your mower blade at three inches, or higher. Taller grass helps prevent weed growth (and the use of weed killers!) Additional grass height shades the surface of the soil better and thus reduces its temperature and the evaporation of water from the soil in midsummer. It may seem counterintuitive, but taller grass needs less mowing, partly because of it having fewer weeds and because taller grass makes the unevenness of the surface is less obvious. Try it!

**12. Aerate your lawn every few years.** Aerating is a simple process that extracts soil cores and strews them over the lawn surface to stimulate grass root growth, enhance oxygen levels, build surface loam, and loosen soil to increase penetration of water and nutrients. Aerators can be rented at lawn and hardware stores.

**By the way, all of these practices are better for the streams because they reduce lawn water loss, shock stream loading, and fertilizer runoff.** ●

## IMPORTANT CITY CONTACTS

**Automated Attendant/  
Direct Connect**  
(937)669-TIPP

**Police, Fire & EMS (EMERGENCY)** 9-1-1

**Miami County Communications Center
